Radiative transfer in spherically symmetric systems. The conservative grey case, <i>D. G. Hummer and G. B. Rybicki</i>	1
On possible observable effects of electron pair production in QSOs, <i>S. Bonometto and M. J. Rees</i>	21
Gravitationally collapsed objects of very low mass, <i>Stephen Hawking</i>	75
Radii, luminosities, and masses from six-colour fitting of galactic Cepheids and other supergiants, <i>Sidney B. Parsons and Gerardus D. Bouw</i>	133
Segregations of material with reference to the formation of the terrestrial planets, <i>I. P. Williams and D. J. Crampin</i>	261
The F-sum rule and Fe I f-values, <i>C. W. Allen</i>	295
Energy changes in close planetary encounters, <i>L. W. Bandermann and R. D. Wolstencroft</i>	377
Interferometric investigations of sources of OH emission—I. Observations with and interferometer baseline of 7×10^5 wavelengths, <i>A. J. Cooper, R. D. Davies and R. S. Booth</i>	383

On the transfer of polarized light in Rayleigh-scattering half spaces with true absorption, <i>T. W. Schnatz and C. E. Siewert</i>	491
A note on the Voigt function, <i>J. J. Monaghan</i>	509
Non-LTE effects for He I in early B type stars, <i>A. Poland and A. Skumanich</i>	18P
Calcium and sodium atoms in dielectric interstellar grains, <i>H. A. J. McIntyre and D. A. Williams</i>	13P
Galactic structure and stellar dynamics	
The kinematics of the Scorpio-Centaurus association and Gould's Belt, <i>D. H. P. Jones</i> ...	231
On quasars, dust and the galactic centre, <i>D. Lynden-Bell and M. J. Rees</i>	461
Galaxies	
Optical monitoring of radio sources—II. The N-type and Seyfert galaxies, <i>R. D. Cannon, M. V. Penston and Rosemary A. Brett</i>	79
Rotation curves in turbulent proto-galaxies, <i>William C. Saslaw</i>	341
Instrumentations	
Observations of rapid blue variables—I. Techniques, <i>R. Edward Nather and Brian Warner</i> ...	209
Interstellar matter	
A search for interstellar H ₂ CS, <i>R. D. Davies, R. S. Booth and A. Pedlar</i>	7P
Calcium and sodium atoms in dielectric interstellar grains, <i>H. A. J. McIntyre and D. A. Williams</i>	13P
Magellanic Clouds	
The variables in NGC 1466, <i>A. J. Wesselink</i>	159
The analysis of the spectrum of the Large Magellanic Cloud supergiant HD 32034, <i>A. Przybylski</i>	197
Pulsars	
Right ascension measures for ten pulsars, <i>C. J. Salter and S. R. Facondi</i>	5P
Quasars	
On possible observable effects of electron pair production in QSOs, <i>S. Bonometto and M. J. Rees</i>	21
On quasars, dust and the galactic centre, <i>D. Lynden-Bell and M. J. Rees</i>	461
The radio structure of quasars—A statistical investigation, <i>George K. Miley</i>	477
Circular polarization of quasars at λ_{21} cm, <i>R. G. Conway, J. A. Gilbert, E. Raimond and K. W. Weiler</i>	1P
Radio astronomy	
Optical monitoring of radio sources—II. The N-type and Seyfert galaxies, <i>R. D. Cannon, M. V. Penston and Rosemary A. Brett</i>	79
Interferometric observations with a baseline of 127 kilometres—II., <i>W. Donaldson, G. K. Miley and H. P. Palmer</i>	145
Optical positions for 87 identified radio sources, <i>R. W. Hunstead</i>	277
The linear polarization of part of the northern sky at 73-cm wavelength, <i>J. R. Baker and F. G. Smith</i>	361
Interferometric investigations of sources of OH emission—I. Observations with and interferometer baseline of 7×10^5 wavelengths, <i>A. J. Cooper, R. D. Davies and R. S. Booth</i>	383
Pencil-beam observations of bright galaxies at 408 MHz, <i>M. J. Cameron</i>	403
The radio luminosity function of bright galaxies, <i>M. J. Cameron</i>	429
The structure of bright galaxies at 408 MHz, <i>M. J. Cameron</i>	439
The radio structure of quasars—A statistical investigation, <i>George K. Miley</i>	477
Circular polarization of quasars at λ_{21} cm, <i>R. G. Conway, J. A. Gilbert, E. Raimond and K. W. Weiler</i>	1P
A search for interstellar H ₂ CS, <i>R. D. Davies, R. S. Booth and A. Pedlar</i>	7P
Solar system	
Segregation of material with reference to the formation of the terrestrial planets, <i>I. P. Williams and D. J. Crampin</i>	261
Energy changes in close planetary encounters, <i>L. W. Bandermann and R. D. Wolstencroft</i> ...	377

Stars—atmospheres of

- Radiative transfer in spherically symmetric systems. The conservative grey case, *D. G. Hummer and G. B. Rybicki* 1
- The atmospheres of white dwarfs—III. The line spectra, *P. A. Strittmatter and D. T. Wickramasinghe* 47
- Rotationally extended stellar envelopes—II. HD 109378 (κ Dra) and 142929, *J. B. Hutchings* 109
- On the transfer of polarized light in Rayleigh-scattering half spaces with true absorption, *T. W. Schnatz and C. E. Siewert* 491
- A note on the Voigt function, *J. J. Monaghan* 509
- Non-LTE effects for He I in early B type stars, *A. Poland and A. Skumanich* 18P

Stars—binary

- The composite spectrum of γ Circini, *William Buscombe and Bruce Barkstrom* 37
- HD 152667, a spectroscopic binary P Cygni star, *E. N. Walker* 333

Stars—magnetic

- A quantitative investigation of the oblique rotator model for the magnetic variable HD 153882, *M. S. Hockey* 97

Stars—photometry of

- Effective temperatures, intrinsic colours, and surface gravities of yellow supergiants and Cepheids, *Sidney B. Parsons* 121
- The variability of M-stars, *N. R. Stokes* 165

Stars—radial velocities of

- Radial velocities of southern B stars determined at the Radcliffe Observatory—V, *P. W. Hill*, Summary of Memoirs, 75, Part I 513

Stars—rotation of

- Stellar rotation: discrepancies and new results for high mass models, *J. A. J. Whelan, J. C. B. Papaloizou and R. Connon Smith* 9P

Stars—spectra of

- The composite spectrum of γ Circini, *William Buscombe and Bruce Barkstrom* 37
- The atmospheres of white dwarfs—III. The line spectra, *P. A. Strittmatter and D. T. Wickramasinghe* 47
- The analysis of the spectrum of the Large Magellanic Cloud supergiant HD 32034, *A. Przybylski* 197
- HD 152667, a spectroscopic binary P Cygni star, *E. N. Walker* 333

Stars—structure and evolution of

- A quantitative investigation of the oblique rotator model for the magnetic variable HD 153882, *M. S. Hockey* 97
- Radii, luminosities, and masses from six-colour fitting of galactic Cepheids and other supergiants, *Sidney B. Parsons and Gerardus D. Bouw* 133
- On the cause of the nova outburst, *Sumner Starrfield* 307
- Relativistic stellar wind theory: 'Near' zone solutions, *R. N. Henriksen and D. R. Rayburn* 323

Stars—variable

- The variables in NGC 1466, *A. J. Wesselink* 159
- The variability of M-stars, *N. R. Stokes* 165
- Observations of rapid blue variables—I. Techniques, *R. Edward Nather and Brian Warner* 209
- Observations of rapid blue variables—II. U. Geminorum, *Brian Warner and R. Edward Nather* 219

Stars—white dwarf

- The atmospheres of white dwarfs—III. The line spectra, *P. A. Strittmatter and D. T. Wickramasinghe* 47

Universe—cosmology—relativity

- Gravitationally collapsed objects of very low mass, *Stephen Hawking* 75
- Relativistic stellar wind theory: 'Near' zone solutions, *R. N. Henriksen and D. R. Rayburn* 323

INDEX

MONTHLY NOTICES
OF THE
ROYAL ASTRONOMICAL SOCIETY

CONTAINING
PAPERS PUBLISHED IN THE PERIOD
1971 JULY TO SEPTEMBER

VOL. 153

Published for the Royal Astronomical Society by
Blackwell Scientific Publications · Oxford and Edinburgh

AUTHOR INDEX

	PAGE
<i>Aust, C. and Woolfson, M. M.</i> , The floccule theory and planetary formation... ..	21P
<i>Becklin, E. E., Penston, M. V., Penston, Margaret J., Neugebauer, G., Tritton, K. P. and Visvanathan, N.</i> , Observations of NGC 4151 during 1970 in the optical and infra-red ...	29
<i>Bell, R. A. and Branch, David</i> , The colours and chemical composition of the G dwarf HR 72 ...	57
<i>Branch, David and Bell, R. A.</i> , The colours and chemical composition of the G dwarf HR 72 ...	57
<i>Brand, Peter W. J. L.</i> , Photographic photometry with calcite filter calibration (a) inherent errors in the method	523
<i>Brocklehurst, M.</i> , Calculations of the level populations for the low levels of hydrogenic ions in gaseous nebulae... ..	471
<i>Brucato, Robert J.</i> , Time variations in the emission lines of Of stars	435
<i>Brück, M. T.</i> , Photographic photometry with calcite filter calibration (b) Its use in the near infra-red	523
<i>Collins, C. B. and Stewart, J. M.</i> , Qualitative cosmology	419
<i>Connon Smith, R.</i> , The importance of circulation in radiative stellar envelopes	33P
<i>Crampton, David</i> , Wolf-Rayet stars in H II regions	303
<i>Davies, R. D. and Jager, G. de</i> , Neutral hydrogen in M33	9
<i>Dermott, S. F.</i> , The Mimas-Tethys resonance formation problem	83
<i>Dickens, R. J., French, V. A., Owt, P. W., Penny, A. J. and Powell, A. L. T.</i> , An abundance analysis of the Delta Scuti Variable 20 CVn	1
<i>Dickens, R. J. and Penny, A. J.</i> , Effective temperatures and gravities for A- and F-type stars in the Delta Scuti region	287
<i>Edwards, D.</i> , Time scale of the expansion for cosmological models with radiation	17P
<i>Fairall, A. P.</i> , Compact galaxies	383
<i>Ford, V. L. and Mathewson, D. S.</i> , Summary of <i>Memoir</i> , 74, Part 5. Polarization observations of 1800 stars	525
<i>French, V. A., Dickens, R. J., Owt, P. W., Penny, A. J. and Powell, A. L. T.</i> , An abundance analysis of the Delta Scuti Variable 20 CVn	1
<i>Graham, D. A., Lyne, A. G. and Smith, F. G.</i> , Characteristics of the radio pulses from the pulsars	347
<i>Harrison, E. R.</i> , Outward drift of the interstellar medium in the disk of the Galaxy	12P
<i>Higgs, L. A.</i> , A survey of microwave radiation from planetary nebulae	315
<i>Hill, J. M.</i> , A measurement of the gravitational deflection of radio waves by the Sun	7P
<i>Hunt, G. C.</i> , The rate of change of period of the pulsars	119
<i>Jager, G. de and Davies, R. D.</i> , Neutral hydrogen in M33	9
<i>Jeffreys, Harold</i> , The Moon's librations	73
<i>Keenan, Philip C.</i> , Spectrum of Welch's red variable in Crux	1P
<i>Luebke, William R. and Mihalas, Dimitri</i> , A non-LTE picket-fence model in radiative equilibrium	229
<i>Lyne, A. G.</i> , Mode changing in pulsar radiation	27P
<i>Lyne, A. G., Smith, F. G. and Graham, D. A.</i> , Characteristics of the radio pulses from the pulsars	347
<i>Martin, P. G.</i> , The ratio of total to selective extinction and the distance to the galactic centre	251
<i>Martin, P. G.</i> , On interstellar grain alignment by a magnetic field	279
<i>Mathewson, D. S. and Ford, V. L.</i> , Polarization observations of 1800 stars	525
<i>May, T. L. and McVittie, G. C.</i> , Uniform model universes containing matter and blackbody radiation—II	491
<i>McVittie, G. C. and May, T. L.</i> , Uniform model universes containing matter and blackbody radiation—II	491
<i>Mihalas, Dimitri and Luebke, William R.</i> , A non-LTE picket-fence model in radiative equilibrium	229
<i>Mitton, Simon</i> , Observations of the distribution of polarized emission of Cygnus A at 6-cm wavelength	133
<i>Moffat, P. H.</i> , The Cygnus loop at 1420 MHz	401
<i>Monaghan, J. J. and Smart, N. C.</i> , Rapid differential rotation in main sequence stars	195
<i>Morgan, Lesley A.</i> , The emission line spectrum of the Orion Nebula in the wavelength range 4959 to 8665 Å	393
<i>Moss, D. L.</i> , The evolution of contact binary systems of moderate mass	41
<i>Mullan, D. J.</i> , The structure of transverse hydromagnetic shocks in regions of low ionization	145
<i>Nandy, K. and Wickramasinghe, N. C.</i> , Optical properties of graphite-iron-silicate grain mixtures	205
<i>Nandy, K.</i> , Multicolour photometry of the stars in NGC 2264	521

<i>Neugebauer, G., Penston, M. V., Penston, Margaret J., Tritton, K. P., Becklin, E. E. and Visvanathan, N.</i> , Observations of NGC 4151 during 1970 in the optical and infra-red ...	29
<i>Owst, P. W., Dickens, R. J., French, V. A., Penny, A. J. and Powell, A. L. T.</i> , An abundance analysis of the Delta Scuti variable 20 CVn ...	1
<i>Penny, A. J., Dickens, R. J., French, V. A., Owst, P. W. and Powell, A. L. T.</i> , An abundance analysis of the Delta Scuti Variable 20 CVn ...	1
<i>Penny, A. J. and Dickens, R. J.</i> , Effective temperatures and gravities for A- and F-type stars in the Delta Scuti region ...	287
<i>Penston, Margaret J., Penston, M. V., Neugebauer, G., Tritton, K. P., Becklin, E. E. and Visvanathan, N.</i> , Observations of NGC 4151 during 1970 in the optical and infra-red ...	29

SUBJECT INDEX

Celestial mechanics	PAGE
The Mimas-Tethys resonance formation problem, <i>S. F. Dermott</i> ...	83
The possibility of capture in the restricted problem of three bodies and formation of bridges between galaxies, <i>Shin Yabushita</i> ...	97
Cosmology	
Qualitative cosmology, <i>C. B. Collins and J. M. Stewart</i> ...	419
Uniform model universes containing matter and blackbody radiation—II, <i>T. L. May and G. C. McVittie</i> ...	491
Time scale of the expansion for cosmological models with radiation, <i>D. Edwards</i> ...	17P
Galactic structure	
The ratio of total to selective extinction and the distance to the galactic centre, <i>P. G. Martin</i> ...	251
Outward drift of the interstellar medium in the disk of the Galaxy, <i>E. R. Harrison</i> ...	12P
Galaxies	
Neutral hydrogen in M33, <i>G. de Jager and R. D. Davies</i> ...	9
Observations of NGC 4151 during 1970 in the optical and infra-red, <i>M. V. Penston, Margaret J. Penston, G. Neugebauer, K. P. Tritton, E. E. Becklin and N. Visvanathan</i> ...	29
The possibility of capture in the restricted problem of three bodies and formation of bridges between galaxies, <i>Shin Yabushita</i> ...	97
Compact galaxies, <i>A. P. Fairall</i> ...	383

General relativity

- A measurement of the gravitational deflection of radio waves by the Sun, *J. M. Hill* ... 7P

Instrumentation

- Maksutov spectrograph cameras, *C. G. Wynne* ... 261
 Photographic photometry with calcite filter calibration (a) inherent errors in the method,
Peter W. J. L. Brand (Summary of Royal Observatory, Edinburgh publication) ... 523

Interstellar matter

- Neutral hydrogen in M33, *G. de Jager and R. D. Davies* ... 9
 Optical properties of graphite-iron-silicate grain mixtures, *N. C. Wickramasinghe and K. Nandy* ... 205
 The ratio of total to selective extinction and the distance to the galactic centre, *P. G. Martin* ... 251
 On interstellar grain alignment by a magnetic field, *P. G. Martin* ... 279
 Outward drift of the interstellar medium in the disk of the Galaxy, *Edward R. Harrison* ... 12P

Nebulae—gaseous

- Wolf-Rayet stars in H II regions, *David Crampton* ... 303
 The emission line spectrum of the Orion Nebula in the wavelength range 4959 to 8665 Å,
Lesley A. Morgan ... 393
 The Cygnus Loop at 1420 MHz, *P. H. Moffat* ... 401
 Calculations of the level populations for the low levels of hydrogenic ions in gaseous nebulae,
M. Brocklehurst ... 471

Nebulae—planetary

- A survey of microwave radiation from planetary nebulae, *L. A. Higgs* ... 315

Physical processes

- The structure of transverse hydromagnetic shocks in regions of low ionization, *D. J. Mullan* ... 145
 Optical properties of graphite-iron-silicate grain mixtures, *N. C. Wickramasinghe and K. Nandy* ... 205
 On interstellar grain alignment by a magnetic field, *P. G. Martin* ... 279
 Calculations of the level populations for the low levels of hydrogenic ions in gaseous nebulae,
M. Brocklehurst ... 471

Pulsars

- The rate of change of period of the pulsars, *G. C. Hunt* ... 119
 Characteristics of the radio pulses from the pulsars, *A. G. Lyne, F. G. Smith and D. A. Graham* ... 347
 Mode changing in pulsar radiation, *A. G. Lyne* ... 27P

Quasars

- Optical monitoring of radio sources—III. Further observations of quasars, *K. P. Tritton and Rosemary A. Selmes* ... 453
 Circular polarization in quasars, *A. G. Pacholczyk and T. L. Swihart* ... 3P

Radio astronomy

- Neutral hydrogen in M33, *G. de Jager and R. D. Davies* ... 9
 The rate of change of period of the pulsars, *G. C. Hunt* ... 119
 Observations of the distribution of polarized emission of Cygnus A at 6 cm wavelength,
Simon Mitton ... 133
 A survey of microwave radiation from planetary nebulae, *L. A. Higgs* ... 315
 Characteristics of the radio pulses from the pulsars, *A. G. Lyne, F. G. Smith and D. A. Graham* ... 347
 The Cygnus Loop at 1420 MHz, *P. H. Moffat* ... 401
 Optical monitoring of radio sources—III. Further observations of quasars, *K. P. Tritton and Rosemary A. Selmes* ... 453
 Circular polarization in quasars, *A. G. Pacholczyk and T. L. Swihart* ... 3P
 A measurement of the gravitational deflection of radio waves by the Sun, *J. M. Hill* ... 21P
 The floccule theory and planetary formation, *C. Aust and M. M. Woolfson* ... 21P
 Mode changing in pulsar radiation, *A. G. Lyne* ... 27P

Solar system

- The Moon's librations, *Harold Jeffreys* ... 73
 The Mimas-Tethys resonance formation problem, *S. F. Dermott* ... 83
 The floccule theory and planetary formation, *C. Aust and M. M. Woolfson* ... 21P

Space science

- Ultra-violet continuum brightnesses of stars measured by a rocket-borne photoelectric spectrometer, *G. C. Sudbury* 241

Star clusters

- Multicolour photometry of the stars in NGC 2264, *K. Nandy* (Summary of Royal Observatory, Edinburgh publication) 521

Stars—atmospheres of

- A non-LTE picket-fence model in radiative equilibrium, *Dimitri Mihalas and William R. Luebbe* 229

Stars—binary

- The evolution of contact binary systems of moderate mass, *D. L. Moss* 41
The importance of circulation in radiative stellar envelopes, *R. Cannon Smith* ... 33P

Stars—chemical composition

- An abundance analysis of the Delta Scuti Variable 20 CVn, *R. J. Dickens, V. A. French, P. W. Oust, A. J. Penny and A. L. T. Powell* 1
The colours and chemical composition of the G dwarf HR 72, *David Branch and R. A. Bell* 57
Analysis of the spectrum of the Ao III halo star HD 106304, *A. Przybylski* 111
Stellar compositions from narrow band photometry—I. Iron abundances in 180 G and K giants, *P. M. Williams* 171
Spectrum of Welch's red variable in Crux, *Philip C. Keenan* 1P

Stars—emission line

- Wolf-Rayet stars in H II regions, *David Crampton* 303
Time variations in the emission lines of Of stars, *Robert J. Brucato* 435

Stars—photometry of

- Stellar compositions from narrow-band photometry—I. Iron abundances in 180 G and K giants, *P. M. Williams* 171
Ultra-violet continuum brightnesses of stars measured by a rocket-borne photoelectric spectrometer, *G. C. Sudbury* 241
Effective temperatures and gravities for the A- and F-type stars in the Delta Scuti region, *R. J. Dickens and A. J. Penny* 287
On the energy distributions of main sequence stars, *David J. Stickland* 501
Multicolour photometry of the stars in NGC 2264, *K. Nandy* (Summary of Royal Observatory, Edinburgh publication) 521
Photographic photometry with calcite filter calibration (a) inherent errors in the method, *Peter W. J. L. Brand* (Summary of Royal Observatory, Edinburgh publication) ... 523
Photographic photometry with calcite filter calibration (b) its use in the near infra-red, *M. T. Brück* (Summary of Royal Observatory, Edinburgh publication) 523
Polarization observations of 1800 stars, *D. S. Mathewson and V. L. Ford* (Summary of *Memoirs*, 74, Part 5) 525

Stars—rotation of

- Rapid differential rotation in main sequence stars, *J. J. Monaghan and N. C. Smart*... .. 195

Stars—spectra of

- Analysis of the spectrum of the Ao III halo star HD 106304, *A. Przybylski* 111
Spectrum of Welch's red variable in Crux, *Philip C. Keenan* 1P

Stars—structure and evolution of

- The evolution of contact binary systems of moderate mass, *D. L. Moss* 41

Stars—variable

- An abundance analysis of the Delta Scuti Variable 20 CVn, *R. J. Dickens, V. A. French, P. W. Oust, A. J. Penny and A. L. T. Powell* 1
Effective temperatures and gravities for the A- and F-type stars in the Delta Scuti region, *R. J. Dickens and A. J. Penny* 287
Time variations in the emission lines of Of stars, *Robert J. Brucato* 435
Spectrum of Welch's red variable in Crux, *Philip C. Keenan* 1P

1870

1. The first of the three main branches of the tree is the one which is the most common and the most important.

1871

2. The second of the three main branches of the tree is the one which is the most common and the most important.

1872

3. The third of the three main branches of the tree is the one which is the most common and the most important.

1873

4. The fourth of the three main branches of the tree is the one which is the most common and the most important.

1874

5. The fifth of the three main branches of the tree is the one which is the most common and the most important.

6. The sixth of the three main branches of the tree is the one which is the most common and the most important.

7. The seventh of the three main branches of the tree is the one which is the most common and the most important.

1875

8. The eighth of the three main branches of the tree is the one which is the most common and the most important.

1876

9. The ninth of the three main branches of the tree is the one which is the most common and the most important.

10. The tenth of the three main branches of the tree is the one which is the most common and the most important.

11. The eleventh of the three main branches of the tree is the one which is the most common and the most important.

12. The twelfth of the three main branches of the tree is the one which is the most common and the most important.

13. The thirteenth of the three main branches of the tree is the one which is the most common and the most important.

1877

14. The fourteenth of the three main branches of the tree is the one which is the most common and the most important.

1878

15. The fifteenth of the three main branches of the tree is the one which is the most common and the most important.

16. The sixteenth of the three main branches of the tree is the one which is the most common and the most important.

17. The seventeenth of the three main branches of the tree is the one which is the most common and the most important.

18. The eighteenth of the three main branches of the tree is the one which is the most common and the most important.

19. The nineteenth of the three main branches of the tree is the one which is the most common and the most important.

Mapping of neutral hydrogen in galaxies by aperture synthesis techniques, <i>J. E. Baldwin, C. Field, P. J. Warner and M. C. H. Wright</i> ...	445

Nebulae—gaseous

Dust in the Orion nebula, <i>K. Nandy and N. C. Wickramasinghe</i> ...	255
--	-----

Nebulae—planetary

- The dynamics and thermal stability of planetary nebulae, *James H. Hunter and Sabatino Sofia* 393

Physical processes

- Radiative transfer in spherically symmetric systems—II. The non-conservative case and linearly polarized radiation, *J. P. Cassinelli and D. G. Hummer* ... 9
- A fluid dynamical model of the accretion process, *R. Hunt* ... 141
- Effect of shock wave dissipation on the stability of the interstellar medium, *J. Anthony Burke* 385
- Cellular convection in model stellar envelopes, *D. J. Mullan* ... 467
- On the adiabatic expansion of a relativistic gas, *P. T. Landsberg, W. C. Saslaw and A. J. Haggett* 7P

Pulsars

- Relativistic beaming of pulsars—the effect of the emission spectrum, *F. G. Smith* ... 5P

Quasars

- On the V/V_m test applied to quasi-stellar radio sources, *M. J. Rees and M. Schmidt* ... 1
- Observations of the structure of radio sources in the 3C catalogue—V. The properties of sources in a complete sample, *Craig D. Mackay* ... 209

Radio astronomy

- On the V/V_m test applied to quasi-stellar radio sources, *M. J. Rees and M. Schmidt* ... 1
- Interacting radio galaxies, *J. M. Hill and M. S. Longair* ... 125
- Observations of the structure of radio sources in the 3C catalogue—V. The properties of sources in a complete sample, *Craig D. Mackay* ... 209
- Atmospheric limitations to the angular resolution of aperture synthesis radio telescopes, *Richard Hinder and Martin Ryle* ... 229
- The local luminosity function and the secular evolution of extragalactic radio sources, *W. Davidson* ... 339
- Mapping of neutral hydrogen in galaxies by aperture synthesis techniques, *J. E. Baldwin, C. Field, P. J. Warner and M. C. H. Wright* ... 445
- A compact radio component in M82, *P. N. Wilkinson* ... 1P
- Relativistic beaming of pulsars—the effect of the emission spectrum, *F. G. Smith* ... 5P
- The flux density scale for radio sources at 81.5 MHz, *P. F. Scott and J. R. Shakeshaft* ... 17P

Solar system

- The fragmentation of the asteroids—II. Numerical calculations, *Brian Hellyer* ... 279

Stars—atmospheres of

- Radiative transfer in spherically symmetric systems—II. The non-conservative case and linearly polarized radiation, *J. P. Cassinelli and D. G. Hummer* ... 9
- Meridional circulation in rotating stellar atmospheres—II. The effect of variable opacity, *D. Brand and R. Connon Smith* ... 293
- Theoretical colours for F and G dwarf stars, *R. A. Bell* ... 343
- Measurement of limb darkening on the white dwarf BD + 16° 516B, *Brian Warner, Edward L. Robinson and R. Edward Nather* ... 455
- Curves of growth and line profiles for neutral helium lines in early type stars, *B. J. O'Mara and R. W. Simpson* (Summary of *Memoirs* 75 Part 2) ... 505

Stars binary

- A spectroscopic reconnaissance of a new β Lyrae system HD 72754, *A. D. Thackeray*... 103
- Star spots or grey veils? CO Eri and others, *David S. Evans* ... 329
- Measurement of limb darkening on the white dwarf BD + 16° 516B, *Brian Warner, Edward L. Robinson and R. Edward Nather* ... 455

Stars—chemical composition

- Spectroscopic observations of SC stars, *R. M. Catchpole and M. W. Feast* ... 197
- Magnesium hydride in the Sun, *D. L. Lambert, E. A. Mallia and A. D. Petford* ... 265
- Theoretical colours for F and G dwarf stars, *R. A. Bell* ... 343
- Curves of growth and line profiles for neutral helium lines in early type stars, *B. J. O'Mara and R. W. Simpson* (Summary of *Memoirs* 75 Part 2) ... 505
- A lithium rich star in Sco-Cen, *R. M. Catchpole* ... 13P

Stars—emission line

- On the excitation mechanism of N III emission in the Of Stars, *Robert J. Brucato and Dimitri Mihalas* ... 491

Stars—photometry of

- Intermediate-band photometry of RR Lyrae variables—I. Definition and characteristics of the system, *D. H. P. Jones* ... 79
 High speed photometry, *E. J. Kibblewhite and R. V. Willstrop* ... 301
 Star spots or grey veils? CO Eri and others, *David S. Evans* ... 329

Stars—rotation of

- Stars without circulation. The effect of slight differential rotation in the convective core of upper main sequence stars, *J. J. Monaghan* ... 47
 Meridional circulation in rotating stellar atmospheres—II. The effect of variable opacity, *D. Brand and R. Cannon Smith* ... 293

Stars—spectra of

- A spectroscopic reconnaissance of a new β Lyrae system HD 72754, *A. D. Thackeray* ... 103
 Spectroscopic observations of SC stars, *R. M. Catchpole and M. W. Feast* ... 197
 On the nature of eta Carinae, *Kris Davidson* ... 415
 On the excitation mechanism of N III emission in the Of Stars, *Robert J. Brucato and Dimitri Mihalas* ... 491

Star—structure and evolution

- Quantitative results of stellar evolution and pulsation theories, *K. Fricke, R. S. Stobie and P. A. Strittmatter* ... 23
 Stars without circulation. The effect of slight differential rotation in the convective core of upper main sequence stars, *J. J. Monaghan* ... 47
 The site of the helium flash, *Peter Russell Owen* ... 59
 Cellular convection in model stellar-envelopes, *D. J. Mullan* ... 467

Stars—variable

- Quantitative results of stellar evolution and pulsation theories, *K. Fricke, R. S. Stobie and P. A. Strittmatter* ... 23
 Intermediate-band photometry of RR Lyrae variables—I. Definition and characteristics of the system, *D. H. P. Jones* ... 79
 On the nature of eta Carinae, *Kris Davidson* ... 415

Sun

- Magnesium hydride in the Sun, *D. L. Lambert, E. A. Mallia and A. D. Petford* ... 265

X-ray sources

- On the nature of Centaurus X-2, *Sabatino Sofia* ... 9P

1. The first part of the book is devoted to a general introduction to the subject of the history of the English language. It discusses the various factors which have influenced the development of the language, such as contact with other languages, internal changes, and the influence of social and cultural factors.
2. The second part of the book is devoted to a detailed study of the history of the English language from the beginning of the 15th century to the present. It discusses the various stages of the language, from Old English to Middle English to Modern English, and the changes which have taken place in each stage.
3. The third part of the book is devoted to a study of the history of the English language in the United States. It discusses the various influences which have shaped the American English, such as the influence of the British, the influence of the French, and the influence of the Spanish.
4. The fourth part of the book is devoted to a study of the history of the English language in the world. It discusses the various influences which have shaped the English spoken in different parts of the world, such as the influence of the British, the influence of the French, and the influence of the Spanish.
5. The fifth part of the book is devoted to a study of the history of the English language in the future. It discusses the various factors which may influence the development of the language in the future, such as contact with other languages, internal changes, and the influence of social and cultural factors.
6. The sixth part of the book is devoted to a study of the history of the English language in the present. It discusses the various factors which have influenced the development of the language in the present, such as contact with other languages, internal changes, and the influence of social and cultural factors.
7. The seventh part of the book is devoted to a study of the history of the English language in the past. It discusses the various factors which have influenced the development of the language in the past, such as contact with other languages, internal changes, and the influence of social and cultural factors.
8. The eighth part of the book is devoted to a study of the history of the English language in the future. It discusses the various factors which may influence the development of the language in the future, such as contact with other languages, internal changes, and the influence of social and cultural factors.
9. The ninth part of the book is devoted to a study of the history of the English language in the present. It discusses the various factors which have influenced the development of the language in the present, such as contact with other languages, internal changes, and the influence of social and cultural factors.
10. The tenth part of the book is devoted to a study of the history of the English language in the past. It discusses the various factors which have influenced the development of the language in the past, such as contact with other languages, internal changes, and the influence of social and cultural factors.

INDEX

MONTHLY NOTICES

OF THE

ROYAL ASTRONOMICAL SOCIETY

CONTAINING

**PAPERS PUBLISHED IN THE PERIOD
1971 NOVEMBER TO 1972 FEBRUARY**

VOL. 155

**Published for the Royal Astronomical Society by
Blackwell Scientific Publications · Oxford, London and Edinburgh**

AUTHOR INDEX

	PAGE
<i>Adam, M. G.</i> , Precise determinations of the magnetic vector in sunspots	169
<i>Baldwin, J. E.</i> (see <i>Wright, M. C. H.</i>)	337
<i>Bell, R. A.</i> , The temperatures, abundances and gravities of F dwarf stars	65
<i>Castor, John I. and Nussbaumer, H.</i> , On the excitation of C III in Wolf-Rayet envelopes ...	293
<i>Chandrasekhar, S. and Elbert, Donna D.</i> , Some elementary applications of the virial theorem to stellar dynamics	435
<i>Chiam, T. C. and Monaghan, J. J.</i> , Axisymmetric multipole magnetic fields in polytropic stars ...	153
<i>Demarque, Pierre and Heasley, James N.</i> , Red giant evolution to the helium flash of a super-metal-rich star	85
<i>Eichhorn, Heinrich and Gatewood, George</i> , The positions and proper motions of 127 stars in the region of WX Centauri	415
<i>Elbert, Donna D. and Chandrasekhar, S.</i> , Some elementary applications of the virial theorem to stellar dynamics	435
<i>Fosbury, R. A. E.</i> , A possible identification of Nd II in emission in Arcturus	7P
<i>Gatewood, George and Eichhorn, Heinrich</i> , The positions and proper motions of 127 stars in the region of WX Centauri	415
<i>Griffin R.</i> , Curve-of-growth analysis of the spectrum of Procyon	139
<i>Griffin, R. F.</i> , Photoelectric radial velocities, Paper IV. 528 7 ^m -10 ^m stars in the +15° selected areas	1
<i>Griffin, R. F.</i> , Photoelectric radial velocities, Paper V. 69 southern HR stars	449
<i>Haggerty, Michael J. and Wertz, James R.</i> , On the redshift-magnitude relation in hierarchical cosmologies	495
<i>Hearn, A. G.</i> , Departures from local thermodynamic equilibrium in the neutral helium lines of early type stars	3P
<i>Heasley, James N. and Demarque, Pierre</i> , Red giant evolution to the helium flash of a super-metal-rich star	85
<i>Heidmann, Jean, Heidmann, Nicole and Vaucouleurs, Gerard de</i> , Inclination and absorption effects on the apparent diameters, optical luminosities and neutral hydrogen radiation of galaxies—I. Optical and 21-cm line data, Summary of <i>Memoirs</i> 75, Part 4)	505
<i>Heidmann, Jean, Heidmann, Nicole and Vaucouleurs, Gerard de</i> , Inclination and absorption effects on the apparent diameters, optical luminosities and neutral hydrogen radiation of galaxies—II. Empirical properties (Summary of <i>Memoirs</i> 75, Part 5)	505
<i>Heidmann, Jean, Heidmann, Nicole and Vaucouleurs, Gerard de</i> , Inclination and absorption effects on the apparent diameters, optical luminosities and neutral hydrogen radiation of galaxies—III. Theory and applications (Summary of <i>Memoirs</i> 75, Part 6)	506
<i>Heidmann, Nicole</i> (see <i>Heidmann, Jean</i>)	505
<i>Hoyle, F. and Narlikar, J. V.</i> , Cosmological models in a conformally invariant gravitational theory—I. The Friedmann models	305
<i>Hoyle, F. and Narlikar, J. V.</i> , Cosmological models in a conformally invariant gravitational theory—II. A new model... ..	323
<i>Hughes, David W.</i> , A radar determination of the right ascension and declination of the Quadrantid meteor stream	395
<i>Hughes, David W. and Stephenson, D. G.</i> , The diurnal variation in the mass distribution of sporadic meteors	403
<i>Hutchings, J. B. and Wright, K. O.</i> , Rotationally extended stellar envelopes—III. The Be component of VV Cephei... ..	203
<i>Hutchings, J. B. and Laskarides, P. G.</i> , Rotationally extended stellar envelopes IV. The detached shell of HD 187399	357
<i>Langer, G. E.</i> , A note on models for the envelopes of long-period variable stars	199
<i>Laskarides, P. G. and Hutchings, J. B.</i> , Rotationally extended stellar envelopes—IV. The detached shell of HD 187399	357
<i>Lynden-Bell, D.</i> , A method of allowing for known observational selection in small samples applied to 3CR quasars	95
<i>Lynden-Bell, D.</i> , Note on N Galaxies and mini-quasars	119
<i>Martin, P. G.</i> , On the interaction of rotating interstellar grains with cosmic low frequency radiation	283
<i>McVittie, G. C.</i> , Redshifts versus apparent magnitudes for clusters of galaxies	425
<i>Monaghan, J. J. and Chiam, T. C.</i> , Axisymmetric multipole magnetic fields in polytropic stars	153
<i>Monaghan, J. J. and Robson, K. W.</i> , Rotating stars with very large magnetic fields	231
<i>Mitton, Simon</i> , The polarization properties of 65 extragalactic sources in the 3C catalogue ...	373
<i>Narlikar, J. V. and Hoyle, F.</i> , Cosmological models in a conformally invariant gravitational theory—I. The Friedmann models	305

<i>Narlikar, J. V. and Hoyle, F.</i> , Cosmological models in a conformally invariant gravitational theory—II. A new model ...	323
<i>Nussbaumer, H. and Castor, John I.</i> , On the excitation of C III in Wolf-Rayet envelopes ...	293
<i>Powell, A. L. T.</i> , Ages and kinematics of the late F dwarfs in relation to their chemical composition ...	483
<i>Readhead, A. C. S.</i> , Interplanetary scintillation of radio sources at metre wavelengths—II. Theory ...	185
<i>Robson, K. W. and Monaghan, J. J.</i> , Rotating stars with very large magnetic fields ...	231
<i>Sinclair, A. T.</i> , The motions of the satellites of Mars ...	249
<i>Starrfield, Sumner</i> , On the cause of the nova outburst—II. Evolution at $1.00 M_{\odot}$...	129
<i>Stephenson, D. G. and Hughes, David W.</i> , The diurnal variation in the mass distribution of sporadic meteors ...	403
<i>Stickland, D. J. and Whelan, J. A. J.</i> , On the origin of the Am phenomenon ...	11P
<i>Sutton, J. M.</i> , Scattering of pulsar radiation in the interstellar medium ...	51
<i>Tritton, K. P.</i> , Spectroscopy and photography of Southern Hemisphere quasar identifications ...	1P
<i>Vaucouleurs, Gerard de</i> (see <i>Heidmann Jean</i>) ...	505
<i>Wanner, James F.</i> , On the stellar luminosity function from the method of mean absolute magnitudes ...	463
<i>Warner, P. J.</i> (see <i>Wright, M. C. H.</i>) ...	337
<i>Wertz, James R. and Haggerty, Michael J.</i> , On the redshift-magnitude relation in hierarchical cosmologies ...	495
<i>Whelan, J. A. J. and Stickland, D. J.</i> , On the origin of the Am phenomenon ...	11P
<i>Williams, P. M.</i> , Stellar compositions from narrow-band photometry—II. Sodium and manganese in the Hyades and field giants ...	215
<i>Williams, P. M.</i> , The spectrum of Omicron Virginis ...	17P
<i>Willson, M. A. G.</i> , The relative orientation of radio sources ...	275
<i>Willson, M. A. G.</i> , The spectral indices of radio sources selected at 1.4 GHz ...	385
<i>Wright, K. O. and Hutchings, J. B.</i> , Rotationally extended stellar envelopes—III. The Be component of VV Cephei ...	203
<i>Wright, M. C. H., Warner, P. J. and Baldwin, J. E.</i> , High resolution observations of neutral hydrogen in M33—I. The hydrogen distribution ...	337

SUBJECT INDEX

Astrometry

PAGE

The positions and proper motions of 127 stars in the region of WX Centauri, <i>George Gatewood and Heinrich Eichhorn</i> ...	415
--	-----

Celestial mechanics

The motions of the satellites of Mars, <i>A. T. Sinclair</i> ...	249
--	-----

Cosmology

Cosmological models in a conformally invariant gravitational theory—I The Friedmann models, <i>F. Hoyle and J. V. Narlikar</i> ...	305
Cosmological models in a conformally invariant gravitational theory—II A new model, <i>F. Hoyle and J. V. Narlikar</i> ...	323
Redshifts versus apparent magnitudes for clusters of galaxies, <i>G. C. McVittie</i> ...	425
On the redshift-magnitude relation in hierarchical cosmologies, <i>Michael J. Haggerty and James R. Wertz</i> ...	495

Galaxies

Note on N Galaxies and mini-quasars, <i>D. Lynden-Bell</i> ...	119
High resolution observations of neutral hydrogen in M33—I. The hydrogen distribution, <i>M. C. H. Wright, P. J. Warner and J. E. Baldwin</i> ...	337
Redshifts versus apparent magnitudes for clusters of galaxies, <i>G. C. McVittie</i> ...	425
Inclination and absorption effects on the apparent diameters, optical luminosities and neutral hydrogen radiation of galaxies—I. Optical and 21-cm line data, <i>Jean Heidmann, Nicole Heidmann and Gerard de Vaucouleurs</i> (Summary of <i>Memoirs 75</i> , Part 4) ...	505

	PAGE
Inclination and absorption effects on the apparent diameters, optical luminosities and neutral hydrogen radiation of galaxies—II. Empirical properties, <i>Jean Heidmann, Nicole Heidmann and Gerard de Vaucouleurs</i> (Summary of <i>Memoirs 75</i> , Part 5)	505
Inclination and absorption effects on the apparent diameters, optical luminosities and neutral hydrogen radiation of galaxies—III. Theory and applications, <i>Jean Heidmann, Nicole Heidmann and Gerard de Vaucouleurs</i> (Summary of <i>Memoirs 75</i> , Part 6)	506
Interstellar matter	
Scattering of pulsar radiation in the interstellar medium, <i>J. M. Sutton</i>	51
On the interaction of rotating interstellar grains with cosmic low frequency radiation, <i>P. G. Martin</i>	283
High resolution observations of neutral hydrogen in M33—I. The hydrogen distribution, <i>M. C. H. Wright, P. J. Warner and J. E. Baldwin</i>	337
Physical processes	
Interplanetary scintillation of radio sources at metre wavelengths—II. Theory, <i>A. C. S. Readhead</i>	185
Pulsars	
Scattering of pulsar radiation in the interstellar medium, <i>J. M. Sutton</i>	51
Quasars	
A method of allowing for known observational selection in small samples applied to 3CR quasars, <i>D. Lynden-Bell</i>	95
Note on N Galaxies and mini-quasars, <i>D. Lynden-Bell</i>	119
Spectroscopy and photography of Southern Hemisphere quasar identifications, <i>K. P. Tritton</i> ...	1P
Radio astronomy	
Scattering of pulsar radiation in the interstellar medium, <i>J. M. Sutton</i>	51
Interplanetary scintillation of radio sources at metre wavelengths—II. Theory, <i>A. C. S. Readhead</i>	185
The relative orientation of radio sources, <i>M. A. G. Willson</i>	275
High resolution observations of neutral hydrogen in M33—I. The hydrogen distribution, <i>M. C. H. Wright, P. J. Warner and J. E. Baldwin</i>	337
The polarization properties of 65 extragalactic sources in the 3C catalogue, <i>Simon Mitton</i> ...	373
The spectral indices of radio sources selected at 1.4 GHz, <i>M. A. G. Willson</i>	385
Solar system	
Interplanetary scintillation of radio sources at metre wavelengths—II. Theory, <i>A. C. S. Readhead</i>	185
The motions of the satellites of Mars, <i>A. T. Sinclair</i>	249
A radar determination of the right ascension and declination of the Quadrantid meteor stream, <i>David W. Hughes</i>	395
The diurnal variation in the mass distribution of sporadic meteors, <i>David W. Hughes and D. G. Stephenson</i>	403
Stars—atmospheres of	
The temperatures, abundances and gravities of F dwarf stars, <i>R. A. Bell</i>	65
Curve-of-growth analysis of the spectrum of Procyon, <i>R. Griffin</i>	139
Rotationally extended stellar envelopes—III. The Be component of VV Cephei, <i>J. B. Hutchings and K. O. Wright</i>	203
On the excitation of C III in Wolf-Rayet envelopes, <i>John I. Castor and H. Nussbaumer</i> ...	293
Rotationally extended stellar envelopes—IV. The detached shell of HD 187399, <i>J. B. Hutchings and P. G. Lasharides</i>	357
Departures from local thermodynamic equilibrium in the neutral helium lines of early type stars, <i>A. G. Hearn</i>	3P
On the origin of the Am phenomenon, <i>D. J. Stickland and J. A. J. Whelan</i>	11P
Stars—chemical composition	
The temperatures, abundances and gravities of F dwarf stars, <i>R. A. Bell</i>	65
Curve-of-growth analysis of the spectrum of Procyon, <i>R. Griffin</i>	139

	PAGE
Stellar compositions from narrow-band photometry—II. Sodium and manganese in the Hyades and field giants, <i>P. M. Williams</i>	215
Ages and kinematics of the late F dwarfs in relation to their chemical composition, <i>A. L. T. Powell</i>	483
Departures from local thermodynamic equilibrium in the neutral helium lines of early type stars, <i>A. G. Hearn</i>	3P
A possible identification of Nd II in emission in Arcturus, <i>R. A. E. Fosbury</i>	7P
On the origin of the Am phenomenon, <i>D. J. Stickland and J. A. J. Whelan</i>	11P
The spectrum of Omicron Virginis, <i>P. M. Williams</i>	17P
Stars—emission line	
On the excitation of C III in Wolf-Rayet envelopes, <i>John I. Castor and H. Nussbaumer</i>	293
Stars—magnetic	
Axisymmetric multipole magnetic fields in polytropic stars, <i>T. C. Chiam and J. J. Monaghan</i>	153
Rotating stars with very large magnetic fields, <i>J. J. Monaghan and K. W. Robson</i>	231
Stars—magnitudes of	
On the stellar luminosity function from the method of mean absolute magnitudes, <i>James F. Wanner</i>	463
Stars—motions of	
Photoelectric radial velocities, Paper IV. 528 7^m – 10^m stars in the $+15^\circ$ selected areas, <i>R. F. Griffin</i>	1
The positions and proper motions of 127 stars in the region of WX Centauri, <i>George Gatewood and Heinrich Eichhorn</i>	415
Some elementary applications of the virial theorem to stellar dynamics, <i>S. Chandrasekhar and Donna D. Elbert</i>	435
Photoelectric radial velocities, Paper V. 69 southern HR stars, <i>R. F. Griffin</i>	449
Ages and kinematics of the late F dwarfs in relation to their chemical composition, <i>A. L. T. Powell</i>	483
Stars—photometry of	
Photoelectric radial velocities, Paper IV. 528 7^m – 10^m stars in the $+15^\circ$ selected areas, <i>R. F. Griffin</i>	1
Stellar compositions from narrow-band photometry—II. Sodium and manganese in the Hyades and field giants, <i>P. M. Williams</i>	215
Photoelectric radial velocities, Paper V. 69 southern HR stars, <i>R. F. Griffin</i>	449
Stars—rotation of	
Rotationally extended stellar envelopes—III. The Be component of VV Cephei, <i>J. B. Hutchings and K. O. Wright</i>	203
Rotating stars with very large magnetic fields, <i>J. J. Monaghan and K. W. Robson</i>	231
Rotationally extended stellar envelopes—IV. The detached shell of HD 187399, <i>J. B. Hutchings and P. G. Laskarides</i>	357
Stars—structure and evolution	
Red giant evolution to the helium flash of a super-metal-rich star, <i>Pierre Demarque and James N. Heasley</i>	85
On the cause of the nova outburst—II. Evolution at $1.00 M_\odot$, <i>Sumner Starrfield</i>	129
Axisymmetric multipole magnetic fields in polytropic stars, <i>T. C. Chiam and J. J. Monaghan</i>	153
A note on models for the envelopes of long-periods variable stars, <i>G. E. Langer</i>	199
Rotating stars with very large magnetic fields, <i>J. J. Monaghan and K. W. Robson</i>	231
Stars—variable	
A note on models for the envelopes of long-period variable stars, <i>G. E. Langer</i>	199
Sun	
Precise determinations of the magnetic vector in sunspots, <i>M. G. Adam</i>	169
